**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 1 and 4-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/21/06.

### ***Priority***

The reference to the priority document in the ADS of 6/18/02, Provisional Application No. 60/114,972, date 1/29/99, appears to be in error, it should be 60/117,972.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Reis (US 5,256,294).

Van Reis teaches a separation device with a feed channel, and more than one permeate channel, permeate channels having independent control devices for pressure and flow control, porous membrane separating the feed and permeate channels – see figure 4A, 4B, and abstract. Regarding the shear region in the feed channel, see that the permeate flow is perpendicular to the feed flow, thus forming the shear region.

2. Claim 2 is rejected under 35 U.S.C. 102(a/e) as being anticipated by Larson et al (US 5,716,559).

Larson teaches a ceramic membrane having feed and plurality of permeate channels isolated from one-another within the membrane, with shear region in feed channel, see figures, abstract.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. DE 4427354, DE 4342485 and WO 96/01676 were cited by the PCT Examiner in the PCT-409 (IPER).
